NEWS RELEASE - FOR IMMEDIATE RELEASE

Gray Manufacturing Company, Inc., a family owned and operated business in St. Joseph, Missouri, specializing in manufacturing and selling portable lifting equipment for use by professional mechanics, announced today that earlier this year it initiated a patent infringement claim in federal court in Canada against Service De Freins Montreal Ltd., Montreal Brakes Services Ltd. In the claim, Gray Manufacturing alleges, among other things, that the defendant violated Gray's Canadian patent related to wireless lifting devices.

In the claim, Gray alleges the defendant imported a wireless mobile column lift device into Canada and offered it for sale in violation of Gray's Canadian patent related to wireless lifting devices. Gray seeks, among other things, damages and injunctive relief preventing the defendant from future conduct that may violate Gray's Canadian patent related to wireless lifting devices.

For over thirteen years, the Gray wireless lift system has been sold worldwide. Gray has always and will continue to vigorously pursue and defend the rights granted under its patents.
